

THE SCIENCE BEHIND WHY THE VIOLET FLAME IS THE MOST POWERFUL FORCE IN THE UNIVERSE

The Violet Flame: The Most Powerful Force in the Universe!

The Violet Flame as the Most Powerful Force in the Universe is a scientific fact and not just a religious or spiritual belief.

The diagram below— and in the Photos section of this Facebook page— shows how a ray of white Light passing through a prism emerges into the seven colors of the rainbow, ranging from red at the bottom of the spectrum, to purple and violet at the top of the rainbow light color spectrum.

THE VIOLET COLOR IS THE TOP OF THE RAINBOW!

THE SCIENCE BEHIND WHY THE VIOLET FLAME IS THE MOST POWERFUL FORCE IN THE UNIVERSE

The Violet Flame: The Most Powerful Force in the Universe!

Violet Flame—Shortest Wavelength Highest Frequency Vibration of Visible Light Highest Energy

It is a universally accepted scientific fact that the shorter the wavelength of a wave is, the higher the frequency or the cycles of motion per second will be, and the higher the energy level the vibration contains.

So color energy vibrations with short wavelengths such as the violet /purple colors correspond to faster frequencies of motion and therefore deliver higher energy than vibrations with longer wavelengths like red as shown on the Prism Rainbow diagram and this Colors of Light Nature Wavelength diagram.

THE SCIENCE BEHIND WHY THE VIOLET FLAME IS THE MOST POWERFUL FORCE IN THE UNIVERSE

The Violet Flame: The Most Powerful Force in the Universe!

The diagram above shows that the violet color has the shortest wavelength (400 nanometers), which according to science and physics corresponds to the highest energy/frequency vibrations of the visible light color spectrum.

The wavelength of the violet color stands at 400 nanometers and corresponds to a frequency vibration of 750 TRILLION cycles per second (seven hundred fifty trillion cycles per second). One trillion is 1,000 billion and a billion is 1,000 million. By way of comparison, the frequency of the electric current used in a regular light bulb or to run your computer is 60 cycles per second.

The Violet Flame Raises and Transmutes the Vibrations of all it Contacts!

Science and physics therefore demonstrates WHY the Violet Flame corresponding to the violet color is the most powerful force in the universe—very simply, it has the shortest wavelength and highest frequency vibration of the visible light spectrum. Therefore it carries and delivers the highest energy force when released.

The violet color is the "top of the rainbow". It raises the vibrations of all it touches to its highest level of potential (vibration) and perfection when used consistently. It simply dissolves lower, negative energies and vibrations, the same way a detergent/soap removes dirt and leaves clothes clean when added to the washing machine.

How the Violet Flame Can Raise the Energies of Your Thoughts, Feelings and Body

You can benefit from the violet flame as you allow it to vibrate through you to raise the energies of your thoughts, feelings and emotions, your physical body and painful memories. It happens as you use the Science of Spoken Word through your vocal chords to release the high frequency energies of the Violet Flame into YOUR life and world and the planet as a whole. Sound and the Spoken Word initiates the FLOW OF ELECTRONS through you.

When you speak a Violet Flame Mantra/Formula such as Saint Germain's Mantra—I AM a Being of Violet Fire, I AM the Purity God Desires—it initiates the flow of electrons through your entire four bodies: physical, emotional, mental and memory bodies at the speed of the vibration frequencies of the violet flame color spectrum, which is as stated above 750 trillion cycles per second!!! That why and how the Violet Flame transmutes and dissolves lower energies and gives a feeling of freedom—it is therefore called the Violet Transmuting Flame of Freedom.

Why Gold is So Attractive: It carries very High Vibrations

The scientific reason why the violet flame is called the philosopher's stone sought by ancient alchemists is because its very high frequencies release energies that change the molecular structure of base metals (low frequencies) into gold (highest frequency of all metals). People are naturally attracted to gold because with its 79 electrons (*silver has 48 electrons*), gold has the highest capacity to carry/conduct/store light and energy. Kings and priests wore "royal purple robes" knowing that the energies released by the violet/purple colors would deflect/consume negative energies.

The Violet Flame, the Flame of Freedom of the Age of Aquarius: Highest Vibrations equal Freedom

The Violet Flame is the Flame of Freedom because, again, it carries the highest vibratory rate of Light and energy of the visible spectrum of Light. For the same reason, it is the flame of the Age of Aquarius, the age of Freedom, Love (*highest frequency*), technology,

sharing liberating information through the mass media like the internet and building communities while valuing individual freedom.

*The Energy and Force of the Violet Flame: a Wave of Light,
Freedom and Love, with the Power of a Beneficial Tsunami*

Imagine yourself standing on a beach, with your feet in water and watching incoming waves. The waves arrive at a certain rate every 5, 10... seconds, etc. . This rate is called frequency, abbreviated as “f” in the formula below. Each wave also has a height, and hits you at your ankle, knee, torso, etc. The height is called the amplitude of the wave, abbreviated as “A”. The wave is also composed of a certain quantity or mass of water abbreviated as “m”. The waves hitting you carry a certain amount of force /energy depending on how fast they are moving and how often (frequency) the waves are hitting you, their height (amplitude) and the quantity/amount of water (mass). A tsunami for instance is made of waves of large quantities (m) of water, very high waves (amplitude), moving at a fast speed and frequency (f).

The mathematical formula showing the amount of Energy (E) in a wave moving with a Frequency “f” and Amplitude (A) with mass of (m) is:

$$E=2\pi^2m f^2A^2$$

You will note that both the frequency and the amplitude of a moving wave are squared and then multiplied by each other in the formula and then multiplied by the mass “m”.

The formula above applies to light/electromagnetic waves as well.

Now let us imagine the sea as a Violet Flame sea, with waves of liquid Violet Flame moving and flowing through you and flooding your entire nervous system, body, mind, emotions, and planet Earth. Let us consider only one factor, the frequency of motion of the violet light in the above formula. As indicated in the previous sections, the violet light vibrates at the frequency of 750 trillion cycles per second. The square of this frequency is 750 trillion times 750 trillion= 562,500 trillion trillion, or 5.625×10^{32} !! This is 5.625, followed by 32 zeros as just one factor in the formula! These are extremely high numbers, representing the flow of vast quantities of energy released by the Violet Flame and Light.

As you recite or sing Violet Flame mantras with feeling and intent, the energy of the light released and moving through you is very high. This extremely fast moving force transmutes negative energies, raises your vibrations and gives you an increasing sense of freedom. The feeling and intensity you put into the spoken word and Violet Flame mantras and songs acts as an amplifier and further multiplies the energy released. As the amplitude of the wave increases and is squared according to the formula above, it acts as an amplifier and delivers more energy.

That is why a relatively small number of people working together in harmony and using high frequency energies like the Violet Flame can be a catalyst to promote positive change in themselves, the environment, and the world.

That is also why the Violet Flame is the Flame of Freedom: It vibrates at the highest frequencies and is therefore the Most Powerful Force in the Universe. Let it flow through you and the planet as a wave of Light, Freedom and Love as you recite at least Saint Germain's Violet Flame mantra: I AM a Being of Violet Fire, I AM the Purity God desires. And then move on to other Violet Flame mantras and songs.

See the photos and videos on this Facebook page and the Saint Germain's Violet Flame Solution YouTube Channel for more detailed information on the Violet Flame, Saint Germain and examples of Violet Flame formulas you can experiment with and put into practice in YOUR life the marriage of science and practical spirituality today!
